

Trex®

All Trex® decking and railing is a unique combination of reclaimed wood and plastic, giving you the best qualities of both materials. The plastic shields the wood from moisture and insect damage, so there's no rotting or splintering. The wood protects the plastic from UV damage and gives your deck a solid, natural feel. It looks great year after year. And because there is no need to spend hours staining or repairing, the enjoyment of a Trex deck is truly timeless.

STAR HAS Decks!

AZEK Deck, a superior decking option that is refining - and redefining - the very notion of building a deck. Engineered with Procell™ Technology, AZEK Deck virtually eliminates the shortfalls associated with wood and composite decking so you can forget the stains and mold problems that are common with the leading composite decks, and since it's scratch resistant, you won't have to worry about scuffing it up during installation and it will keep looking great for years.

Deck Railings don't have to be boring or require constant upkeep. Decorators deck balusters create deck rails that are the signature feature of a home's overall outdoor experience. Whatever your taste, Decorators offers the balusters to create a deck railing to meet your needs.

FastenMaster has identified 11 spots where LOK Line products can be used to replace traditional fastening methods. These task-specific products form stronger building connections - without predrilling, saving you time and money on installed costs. The Cortex® concealed fastening system and TrimTop® stainless steel coated trim screw are the newest additions to FastenMaster's product line.

A TimberTech deck has a remarkably scratch, stain and slip-resistant surface. And it won't need painting, staining or sealing, so you can simply enjoy your outdoor retreat and the time it frees up.

From legendary decking and innovative railing and fencing to hidden fastening and drainage systems, TimberTech's comprehensive product line lives up to the famous brand promise: Less Work. More Life.®
