EXOTIC HARDWOODS NOW IN STOCK

325 S. West Street 316.942.2221

	AFRICAN PADAUK	Moderately hard and heavy, medium texture with large pores. Saws and planes easily to a very smooth surface.
	CANARY WOOD	Can be almost rainbow colored with dark orange streaks along with natural orange, yellow, and brown colorations. Common uses are speakers, cabinets and furniture.
and the second of the second o	IROKO	Sometimes referred to as African Teak. Common uses are veneer, furniture, cabinetry, turned items and other small speciality wood items.
	JATOBA	Also called Brazilian Cherry. Hard, very heavy and very tough. The grain is commonly interlocked with a medium course texture. Popular for furniture pieces.
	LACE WOOD	Has a very conspicuous flecking that gives this wood its namesake. The wood itself is a reddish brown with grey or light brown rays which result in a lace pattern when quarter sawn.
	PURPLE HEART	A beautiful Brazilian species, well known for its distinctive purple color. One of the world's most naturally durable and highly stable wood species. If left to weather, it will turn a beautiful silver grey patina.
	SAPELE WOOD	Used in the construction of fine furniture and cabinet work. Decorative veneers, plywood, joinery, flooring and paneling.
	WENGE	Course texture with a straight grain, hard and heavy. Works fairly well with machine tools but has a high blunting effect on cutting edges. Turns well.
	ZEBRA WOOD	Frequently quarter sawn and used as a decorative veneer.
